PROFESSIONAL SUMMARY

Dynamic professional seeking to build a rewarding career in a forward-thinking, collaborative environment. Eager to apply skills and embrace new challenges while contributing to team success. Committed to continuous growth through innovation, learning, and a dedication to excellence. Passionate about fostering a culture of teamwork and achieving shared goals.

PROJECTS

Bank Management System

Languages/Technologies: Java, MySQL, HTML, CSS, JavaScript

Designed and developed a user-friendly application for managing personal bank accounts.

- Implemented secure login, transaction handling, and account overview features.
- Enabled users to perform fund transfers, view balances, and manage details with ease.
- Focused on responsive, intuitive UI for a smooth user experience across devices.

Help Desk Management System

Languages/Technologies: Python, Django, SQLite, Bootstrap

Built a web-based support ticketing system to manage and streamline student inquiries.

- Developed features for ticket creation, assignment, prioritization, and escalation.
- Integrated knowledge base with FAQs and troubleshooting guides for faster issue resolution.
- Achieved reduced response times and improved support team productivity.

Let me know if you want to highlight frameworks, tools (like Git or APIs), or deployable features.

PASSION ZONE

- Enthusiastic about **learning new algorithms** to improve problem-solving and coding efficiency.
- Continuously **exploring emerging technologies** to stay updated and innovate through modern tools.
- Driven by a desire to **create impactful projects** that demonstrate technical skills and creativity.
- Actively **contributing to open-source projects** to collaborate, learn, and support the developer community.

SKILLS

- **Full Stack Development: -MERN (Mongo DB, Express, React.js, Node)**
- **Front-End: -HTML | CSS | JavaScript**
- **Data Science Tools: -Microsoft Excel | Data Visualizing Using R | Business Intelligence Using Tableau.**
